This was the second year of running the Historic Miniature Rifle event on the Winans range. The quality of shooting was higher than last year, with many scores of 140/140. The two inch bullseye scoring seven is perhaps too easy for a rested rifle at 25 yards. I have resolved these ties by placing a £2.00 coin over the centre of the fired cards, and then adding 0.1 points to all invisible shots. It seems to work , and my decision is final!

Please check your results carefully, especially the class entered and the rifle details. HBSA Prize Certificates will be posted out to winners in the next few weeks. The scores show that having a scope sight does not give any advantage in scores, as we have found in our HBSA April Rook rifle shoot.

I must thank my helpers **Linda and Mike Welsh**, plus **Neil Roberts** for preparing the scores. If anyone wants their shot cards for the record, I can post them out if you send me a big SAE. All comments about improvements, and offers of help for future years will be gratefully received.
